SUMMARY: Aspiring Cloud and DevOps focused B.Tech. Computer Science Student with hands-on experience building and deploying AWS solutions, backed by strong DevOps fundamentals. Shipped end-to-end projects from architecture to deployment and prior 6 months DevOps internship experience.

TECHNICAL SKILLS

Languages & OS: Python, Bash, Ubuntu

DevOps tools: Docker, Kubernetes, Jenkins, Terraform, SSH, Git

AWS: DynamoDB, API Gateway, Lambda, EC2, S3, Amazon SES, IAM, Route 53, VPC, Bedrock, CloudFront, Amplify.

PROJECTS

Nagar Sahayak — AI-Powered Civic Complaint Platform | [Live Demo](#)

Tech Stack: AWS Lambda, API Gateway, Amazon Bedrock, DynamoDB, AWS Amplify, Slack API, AWS SES, S3

- Built a serverless AI agent on AWS that converts multilingual, free-form citizen complaints (text or voice) into structured, department-routed tickets, using Bedrock for field extraction and a custom multi-turn validation flow.
- Designed and deployed a fully serverless backend (Lambda, API Gateway, DynamoDB, S3) handling the full complaint lifecycle – intake, AI drafting, photo/GPS capture, Slack/email notification, and status tracking end-to-end.
- Built a companion admin dashboard with live status management and a geospatial complaint map, giving staff real-time visibility into reported issues.

Multi-Microservice Kubernetes project with ingress-controller | [Project Link](#)

Tech Stack: Kubernetes, Nginx, MySQL, Adminer, Django, KIND cluster

- Developed a multi microservice Kubernetes project deployed on AWS EC2.
- Persistent volume used for data recovery and Horizontal Pod Autoscaler (HPA) to manage the variable load.
- Implemented Kubernetes-based deployment automation using YAML manifests, reducing a manual intervention and operational overhead.

Secure Multi-Tier AWS Network Infrastructure | [Project Link](#)

Tech Stack: AWS VPC, EC2, Internet Gateway, NAT Gateway, Route Tables, Security Groups, Linux

- Designed a secure AWS network architecture with custom VPC, public/private subnets, and CIDR-based IP planning.
- Configured Internet Gateway, NAT Gateway, custom route tables, and Security Groups to enable secure communication while isolating private resources.
- Provisioned Linux EC2 instances and validated end-to-end connectivity through routing and SSH-based administration.

WORK EXPERIENCE

DevOps and Cloud Computing Intern | SureTrust

July 2025 – January 2026

Mentor: Jasdeep Singh Hanspal (Senior Manager, Microsoft)

- Developed CI/CD pipelines using Jenkins to automate application build and deployment.
- Deployed containerized applications on AWS using Docker and Kubernetes.
- Configured Prometheus and Grafana dashboards for infrastructure monitoring.

ACHIEVEMENTS

- **AWS Community Builder (Containers):** Selected as an AWS Community Builder (Containers), contributing to the cloud community through technical content, knowledge sharing, and community engagement.
- **Fully-Sponsored AWS re:Invent Grant:** Selected by AWS for full sponsorship to attend AWS re:Invent in Las Vegas, USA, recognizing contributions to the cloud community.

EDUCATION

B.Tech in Computer Science Engineering | 2023-2027

Khwaja Moinuddin Chishti Language University, Lucknow | **CGPA:** 8.4/10

Class XII (CBSE): 90% | **Class X** (CBSE): 92%

CERTIFICATES

- **Networking Basics** | Cisco Networking Academy
- **Artificial Intelligence Fundamentals** | IBM SkillsBuild
- **AWS Solution Architect Associate (SAA)** | (In Progress)
